

# MACal Glass Decor 700 Series

**An outstanding window film for reliable privacy and enhanced aesthetics.**

**MACal Glass Decor 700** Series is a range of luminous translucent etch films with major benefits for designers, installers and building occupants.

Aesthetics can be transformed with window graphics and with large or small lettering, and the films also protect privacy while ensuring excellent natural light transmission. They are easy to apply and offer a good removability with no adhesive residue on the substrate, so window designs or lettering can be changed as often as required. An outdoor durability of up to 5 years makes the films a first-rate choice if applications need to last.

**MACal Glass Decor 700** Series offers several colours and finishes allowing for many different design options. The films are specially treated to offer an outstanding resistance to stain and ensure an unchanged aspect even after contact with water or oily compounds.

## Application

**MACal Glass Decor 700** Films were specially designed for long-term indoor and outdoor duty as decoration of window panes and shop windows in restaurants, museums, and showrooms, and for room partitioning in banks, offices, homes, etc.
